SQL exposure: SELECT, WHERE, GROUP BY, JOIN, CTEs, subqueries, aggregations, window functions, data-quality checks, relational analysis

Platforms: Salesforce, Git, GitHub, VS Code, DB Browser for SQLite, Microsoft Office, Outlook, Teams, Google Workspace

Fraud & operations: KYC, identity verification, fraud prevention, credit monitoring, alerts, freezes, billing, refunds, complaints, SLA, CSAT, QA, churn, retention, WFM metrics

Systems foundation: Linux, Windows, Bash, PowerShell, networking fundamentals

Languages: Spanish (native/fluent), English (C1 professional proficiency)

PROFESSIONAL EXPERIENCE

Experian Services Costa Rica - Customer Care Specialist I - Identity Protection & Fraud Support

Remote, Costa Rica | Oct 2024 - Apr 2026

- Supported 30-60 customers daily across approximately 112 partner programs, reviewing identity-monitoring alerts, suspected fraud, credit information, account activity, membership issues, and sensitive complaints.
- Analyzed alerts involving email, phone, SSN, SSN traces, and account indicators; explained credit reports and scores without providing financial advice; and guided customers through fraud alerts, freezes, restoration, and claims escalation.
- Documented interactions and complaints in Salesforce, processed enrollments, cancellations, reactivations, subscription changes, billing, and refunds, and maintained approximately 95% quality performance.
- Supported complex partner queues, identified operational inconsistencies, contributed to queue improvement, and provided focused training and case guidance to peers.

Foundever - Customer Protection Associate - Capital One CSID

On-site, Costa Rica | Nov 2023 - Sep 2024

- Performed KYC, document review, identity verification, and fraud-indicator analysis for account applications and access requests involving sensitive consumer data.
- Investigated duplicate accounts or SSNs, prior alerts, suspected identity theft, and account takeover signals; documented evidence and followed established restriction, denial, and escalation procedures.
- Maintained approximately 95% QA, participated in quality calibrations and coaching, and served in a temporary one-month coaching assignment supporting new team members.

Concentrix - Customer Technical Advisor II - Google One

On-site, Pavas, San José, Costa Rica | Jul 2022 - Dec 2022

- Resolved approximately 30 daily contacts across calls, chat, email, and tickets for Google One cloud storage, related Google products, subscriptions, billing, account access, backups, and application issues.
- Used CRM, ticketing, remote support, and knowledge-base systems to troubleshoot, document, analyze, and escalate technical cases; created a shared troubleshooting guide for colleagues.

SELECTED DATA ANALYTICS PROJECTS

Portfolio case studies use synthetic data and are publicly documented on GitHub.

Fraud & Identity Risk Analytics | SQL | Python | Excel | Power BI | SQLite

- Analyzed 60,000 synthetic transactions and 18,000+ alerts to evaluate fraud rate, losses, recoveries, false positives, open cases, and investigation performance.

Customer Support Operations Analytics | SQL | Python | Excel | Power BI | SQLite

- Evaluated 42,000 synthetic tickets using SLA, FCR, repeat contacts, escalations, response time, resolution time, CSAT, and team-performance metrics.

Subscription Churn & Retention Analytics | SQL | Python | Excel | Power BI | SQLite

- Modeled 13,000+ subscriptions and 177,000+ payments to analyze churn, MRR, ARR, refunds, usage, cancellation reasons, reactivation, and cohort retention.

Workforce Planning & Demand Forecasting Analytics | SQL | Python | Excel | Power BI | SQLite

- Analyzed 1.3M+ synthetic contacts across 39,000+ intervals using WAPE, service level, staffing gaps, occupancy, shrinkage, adherence, absence, and capacity scenarios.

EDUCATION & TRAINING

Bachillerato en Educación Media - Liceo de Paraíso | Graduated Jan 2021

Paraíso, Cartago, Costa Rica

Linux Customization - Hack4u Web Academy | 2023

Completed 14 lessons covering Linux command line, Bash, permissions, package management, system customization, networking, Git, and Zsh.
